

CLAIMS

What is claimed is:

1. A three-dimensional puzzle hanging ornament comprising:
a hanging ornament body in three-dimensional shape;
a layer of puzzle pieces which can be attached onto the surface of the hanging ornament body;
a bolt which engages with the hanging ornament body; and
a ring which passes through the bolt.
2. A three-dimensional puzzle hanging ornament as in claim 1, wherein the layer of puzzle pieces comprises a plurality of interlocking puzzle pieces.
3. A three-dimensional puzzle hanging ornament as in claim 2, wherein the surface of the hanging ornament body, onto which the puzzle pieces are attached, is magnetic.
4. A three-dimensional puzzle hanging ornament as in claim 1, wherein the hanging ornament body is in the shape of a sphere.
5. A three-dimensional puzzle hanging ornament as in claim 1, wherein the hanging ornament body is in the shape of a cube.
6. A three-dimensional puzzle hanging ornament as in claim 1, wherein the hanging ornament body is in the shape of an olive.
7. A three-dimensional puzzle hanging ornament as in claim 1, wherein the hanging ornament body is in the shape of a three-dimensional cartoon character.
8. A three-dimensional puzzle hanging ornament as in any of claim 1 to 7, wherein the surface of the front end of the bolt is made of magnet.
9. A three-dimensional puzzle hanging ornament as in any of claim 1 to 7, wherein the hanging ornament body has a round opening with screw threads inside; the front

end of the bolt has screw threads; the bolt and the hanging ornament body can be screwed together.

10. A three-dimensional puzzle hanging ornament as in any of claim 1 to 7, wherein the hanging ornament body has an opening with notches; the front end of the bolt has projections corresponding to the notches; the bolt and the hanging ornament body can be slotted together.
